PET-HAIR CLEANUP ROUTINE

A simple home routine for the places fur likes to gather. Start small and work one surface at a time.

MY THREE FUR HOTSPOTS

1 Check the surface before the tool

- [ ] Read the fabric or furniture care instructions.
- [ ] Test your chosen tool on a small hidden area first.
- [ ] Use only a method suited to that material; stop if it snags or changes the surface.

2 A short reset you can repeat

01	**Gather**	Pick up loose items so the whole surface is reachable.
02	**Collect**	Remove loose hair gently with a suitable brush, roller or vacuum attachment.
03	**Work down**	Finish seating and cushions before the floor beneath them.
04	**Put away**	Empty collected hair and clean the tool as its instructions require.

3 Choose a rhythm you can keep

SPOT	WHEN	DONE
		☐ ☐ ☐ ☐
		☐ ☐ ☐ ☐
		☐ ☐ ☐ ☐

Use household cleanup tools on their intended surfaces. Keep loose parts and cleaning products away from pets.
